DETAILED ACTION

Election/Restrictions

1. Claims 4, 5, 10, and 18-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species B, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/5/06. Examiner note; Although the applicant did not cite claims 4, 5, and 10 as being withdrawn, they are not shown in figures 1-13 of elected species a and therefore have also been withdrawn from consideration.
2. This application contains claims 4, 5, 10, and 18-20 drawn to an invention nonelected. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 6, 9, 11, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Garland (US 2,571,858 A).

Garland discloses an extendable arm for a motor vehicle comprising a main shaft 26, mounting bracket 13, telescoping/extendable/retractable assemblies 45-47, first

drive 18 for horizontal movement, second drive 40 for vertical movement, third drive 57 for telescopic movement, rod 34, finger 37, and tip 38, and controllers 21, 41, 59 for controlling the drives, as shown in figure 1. The added limitation of the term "for internally" is intended use and fails to define over Garland, further the telescoping assemblies are internal relative to main shaft 26.

With respect to claims 2, 3, 11, and 13, the accessory and vehicle are intended uses and therefore their structure and relative location with respect to the arm have been given little patentable weight.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garland, as applied to claim 1 above, and further in view of Romanoff et al. (US 6,820,980 B1).

Garland et al. does not disclose remote controllers and programmable controls. Romanoff et al. does disclose an extendable arm 50 for a motor vehicle 30 comprising a remote and programmable controller 430, as shown in figure 1. It would have been obvious to one having ordinary skill in the art at the time of the invention to have

provided the extendable arm of Garland with the remote programmable controls of Romanoff et al. in order to control the arm from a distance to predetermined positions.

Allowable Subject Matter

7. Claims 12 and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments filed 12/27/06 have been fully considered but they are not persuasive. With respect to the added limitation of the term "internally" is intended use and fails to define over Garland, further the telescoping assemblies are internal relative to main shaft 26.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
